

# RESERVOIR Networking Session at ICT2010

## AGENDA

**"Research/Industry Collaboration on Open Source Cloud Middleware" on September 28, from 11 to 12.30 (Room T012)**

The aim of this networking session is to share experiences and insights to help users, engineers and researchers engaged in cloud deployments to identify better ways to collaborate for developing European open source technology for building clouds. We will discuss the outlook, future directions and required research activities it would take to position cloud as an ideal substrate for service delivery in the Future Internet.

### 1. INTRODUCTION (10')

Brief introduction on the session, including RESERVOIR and SLA@SOI perspectives

*Philippe Massonet*, Scientific Officer, **CETIC**, and RESERVOIR Dissemination Leader

### 2. PANEL (60')

Each speaker will address the following points in a presentation, sharing their experience on the main topic:

- According to them, what are the perspectives for cloud computing, how important is the cloud paradigm for their organisation and what role does open source cloud technology play in their organisation.
  - What are the challenges still to be addressed before considering cloud computing as an ideal solution for delivering infrastructure (IaaS), platform (PaaS) and software (SaaS) services with reduced operational expenditures and improved agility, flexibility, reliability and availability? Can these challenges be addressed by open source technology?
  - How effective has their experience been in terms of collaboration between Research and Industry? Are European open source cloud technology developments reaching their potential users?
  - Do we need to improve the coordination of European open source cloud developments in European research projects? Do we need to improve the packaging of available European open source cloud technology?
  - What needs to be done to establish cloud as an ideal substrate for service delivery in the future internet?
- 
- **SAP** - *Dr. Tariq Ellahi*, SAP Research Program Manager, and SLA@SOI Project Representative
  - **THALES** - *Joseph Latanicki*, IT Security Expert - Theresis, THALES Security Solutions and Services
  - **ATOS Origin** - *Josep Martrat*, Head of Unit and Project Manager, ATOS Origin Research and Innovation
  - **OW2** - *Jean-Pierre Laisné*, Open Source Strategy Director, Bull, Chairman of OW2 (France)
  - **Canonical** - *Nick Barcet*, Cloud Solutions Lead, Canonical
  - **Telefónica** - *Juan Cáceres*, Research Manager, Cloud Computing Area, Telefónica I+D

# RESERVOIR Networking Session at ICT2010

- **Complutense University of Madrid** - *Rubén S. Montero*, Associate Professor, Department of Computer Architecture and Systems Engineering at UM and OpenNebula co-Lead
- **OGF Europe/SIENA** - *Silvana Muscella*, Managing Director, Trust-IT

### 3. DEBATE (20')

Open discussion/debate with the audience and synchronisation of the positions of the different speakers
